BxFxPy, commonly known as just **Box**, or **Bx** is a digital artist that started their art career in 2021. Starting with crude digital drawings in Microsoft Paint, BxFxPy eventually managed higher quality, stylized digital artwork, eventually branching out into other media types such as 3D by animating in Source Filmmaker (SFM) and doing music, the quality of their music, however is subject to scrutiny.

Controversies

- in late 2024, BxFxPy was kicked from a discord server of an undisclosed PNG tuber for being an asshole to one of the members. - in early 2025, BxFxPy would be scrutinized for failing to follow-up on a coin flip deal between a competitor during an OC drawing contest. The outcome of which was decided by popular vote. This resulted in the creation of a google document listing their supposed crimes against said user. The validity of which is currently unknown given the document's supposed deletion. This led to BxFxPy being disqualified due to *unknown controversy*.
