2gawr2gura also known as **2g2g** was a short-lived planned 2b2t-inspired self-hosted Minecraft anarchy server made for Cumball members by the roleplayer known as [Basil](#). Although plans were made, assets were created, and the server was launched offline, it did not launch on the internet because Basil's ISP did not allow port-forwarding and Basil refused to host the server any other way.

Discord server

To promote the server and have out-of-server discussions, a Discord server was created in August 2021 and had multiple notable Cumball members like [meow](#) and [Scotchy](#) who assisted Basil in creating the server until it and the server were abandoned.
