Lo-Fi Playlist, also known as **lofi**, or **low fee** is a former longstanding member of Cumball and current friend/ally of Filled With Nothing. Although he is presently not in the server, he is supposedly still in the server on an alt and has spent years in the server and possibly its precursor. He supposedly lived in California in 2022 and it is assumed he still lives there today, as he has stated to use the same timezone shared with the state recently.

Despite his spotty and sporadic activity in Cumball, he is known throughout the server by other longstanding members and even some newer ones when someone reposts some of his infamous edits and memes, with the most emblematic one being Mun Twitter. Although he didn't create the original GIF, he used it as a reaction GIF and frequently reposted it in the server for him and others to laugh at.

Origin

Lo-Fi's earliest known appearance was on September 6, 2021 shit-talking members of a Discord server. He would be banned from that server and later join Cumball on the same day, supposedly being invited by MIKUHAVVER.

Relationship with Mun Twitter Wiki

Lo-Fi Playlist is the creator of the old Mun Twitter Wiki hosted on Wikia/Fandom. He created it under the profile Wi-Fi Playlist and created and maintained many of the wiki's pages before it was shut down due to inactivity.

As Cumball member (2021-2025)

low fee was known for being a piece of shit bastard who would constantly insult or berate others fuck you low fee i hate you
