BxFxPy, commonly known as just Bx or Box, is a digital artist that started their career in approximately 2021. The evidence of which is scattered and hidden within the in-erasable memory of the internet. Starting with crude digital drawings in ms paint. BxFxPy crawled up to higher quality, stylized digital artwork, eventually branching out into other media types such as 3D Source Film Maker animations and music. The quality of which is subject to scrutiny.

Controversies

- in late 2024, BxFxPy was kicked from a discord server of an undisclosed PNG tuber for being an asshole to one of the members. - in Early 2025, BxFxPy would be Scrutinized for failing to follow-up on a coin flip deal between a competitor during an OC drawing contest. The outcome of which was decided by popular vote. This resulted in the creation of a google document listing their supposed crimes against said user. The validity of which is currently unknown given the document's supposed deletion. This lead to BxFxPy being disqualified due to “Unknown Controversy”.

Notable Works

- [Monopole Mary \(Franchise\)](#) (All of it)
