Players	at least 35 total players both legitimate and cracked
Activity	Sparsely active, featuring 1-2 players every 2 weeks.
Hosted By	Filled With Nothing through iCunny.com then cunny.zone
Hosted With	Filled With Nothing's personal computer, relayed to connect through cunny.zone with unknown means.
Lifespan	2023-2025, 2025-Present
Demonym	(official demonym unknown), Meinacrafters
Related Servers	2gawr2gura (unofficial previous attempt)

Meinacraft, also known as the **cunny.zone Minecraft server**, the **Cumball Minecraft server** and formerly known as **meinacraft.net**, and the **icunny.com/icunny Minecraft server**, or shortened to **the Minecraft server** is a niche Minecraft Forge anarchy server running on Minecraft version 1.19.2 that has been consistently active since October 2023 and was originally launched in July of that year.

As icunny.com

The server was relaunched on October 21, 2023 and was accessible via icunny.com until icunny.com was closed in 2025.

Although the server was far more stable during this period, it still had issues due to the copious amounts of mods required for the server and players to run at once with some unknown outliers causing extreme desync issues when players are killed, and these issues were compounded by Filled's habit of killing players he disliked, which was nearly all active players in the server.

As cunny.zone

The server was relaunched again in 2025 coinciding with the launch of cunny.zone and has been consistently active since then, although it has not been continuously active like before as either Filled forgets to start the server up, or it could not be started up or accessible because his computer was off or disconnected from the internet.

This contemporary period is marked by consistent inactivity, far more prevalent than before as the server's mods are still unable to be downloaded from cunny.zone/meinacraft, and the server still inherits the problems of all previous versions of the server such as low performance, desync, a bloated modpack, and a low player count.

Memes and Edits

In 2023, the user catgirlskinwalker, known in Cumball as Turrón, or the ENA LARP was well-known for making humorous photoshop edits featuring a fictionalized version of Meinacraft and fictional users interacting in the fictional server. These edits are currently featured on cunny.zone's Meinacraft page.

Join Requirements

Due to the server's extensive list of required mods to join the server, players must allocate at least 6 GiB of RAM for Minecraft, have a good internet connection, and have good single-core performance to join the server and have a playable experience.

Due to the nature of the server being offline, having a valid copy of Minecraft is optional, but it's recommended to have a valid Minecraft account due to the inconvenient nature of using offline accounts in general.

The server contains no anti-cheat so a wide variety of client-side mods and hacked clients are de facto supported.
