n2e21e2

Created	July 15, 2026 at 9:37pm (PST)
V1	Message Clarifier - July 15
V2	Basic LLM - ??
V3	Upgraded LLM - ??
Current Version	V3
Creator	Filled With Nothing
Species	AI, Discord Bot
Accounts	1
Purpose	Fulfill Filled's prophecy
Goal	Become a 1:1 clone of Filled (presumed, not achieved)

n2e21e2 is an AI created by [Filled With Nothing](#). It¹⁾ is a large language model trained off of Filled With Nothing's messages hosted by Filled that can be interacted with through Discord via its bot account. To interact with this LLM, users just need to mention the bot and type something in the same mention. (e.g. @n2e21e2 How are you?)

Origin

n2e21e2 started as a simple bot that clarified a certain message from a list of Filled's messages to send based on the context of a user's input.

The bot is named after Filled's current Discord account n2e21e1, which has its last number incremented by one. Filled has said on many occasions that this is his [Aryan Child](#) as indicated by its server role.

Appearance

n2e21e2's avatar and banner feature the Blue Archive character Kei, with its avatar featuring fanart of her in her prototype outfit. It's presumed that this character in particular was chosen because it echoes the design of Filled's Aryan Child.

Improvements

n2e21e2 has been upgraded over the weeks from a message clarifier to a full LLM capable of creating unique messages from its training data. Filled has complained many times, however that training the AI to his liking is an ongoing stressful process if not impossible due to his very high standards.

Future

It's unknown as of writing whether this AI will be expanded on any further. Filled has shown interest in upgrading its capabilities via training, but it's presumed that he just wants an echo of himself rather than a unique AI for users to interact with. It's possible that he could in the future add integration with [cunny.zone](#) or video games like other AI projects of its kind (such as Neurosama)

1)

It's unknown what it identifies as
