Roleplaying Information

Status	Unconfirmed roleplayer
Characters	Nokotan (unconfirmed, used the same Discord account)
Lifespan	2024-2025

nathatpastel, also known as **nathat**, **nathan**, **pastel**, or later on by multiple usernames and as **Nokotan** when he began roleplaying as the character was a blatant [lolicon](#), self-admitted pedophile, [Cumball nyadmin](#), and an infamous Steam user and Garry's Mod player who exposed dozens of people on multiple occasions to [lolicon pornography](#) through the game's spray system which allows users to share images with others. nathat abused the fact that sprays were unmoderated and the fact that most people had them enabled in settings to share animated or still lolicon pornography to other users of unknown ages.

Origin

nathatpastel first appeared in 2023 when he accepted control of his friend [natshirotan](#)'s Steam account. With this account he would buy the sandbox game Garry's Mod and possibly others to play on the account.

Garry's Mod

In 2023, nathat would play Garry's Mod multiplayer and expose many of its users to lolicon pornography and express his lust towards female children blatantly and unprompted through the game's spray and chat functions, which would make him a very controversial user in the community. Due to his behavior and actions, he would soon be single-handedly responsible for many multiplayer servers disabling sprays, and him being banned from most multiplayer Sandbox servers.

After a long hiatus lasting 2 years, he would go back to the community in early 2025 under a new name, but because he used the same Steam account as before, some detail-oriented members noticed that this new user had the same Steam ID and therefore the same account as nathat which would get him banned from servers he was trying to play. Weeks after getting caught, he would abandon Garry's Mod multiplayer for good.

Discord

As Nokotan

Matrix

Departure

In 2025, nathat would delete his Discord account, private his Steam account (and change its details to look like a default user), and his Matrix account for no official reason, but it is assumed that he guilt for his actions against [Filled With Nothing](#), [Cumball](#), and others.
