

Nyadmin is a position of power roughly equivalent to that of a chat moderator or Discord admin in Cumball's Discord server, Matrix room, and more. They have the power to create, delete, or move channels, and mute, kick and ban users in the Discord server. They also have power in Cumball's Matrix space, being able to delete rooms, change room addresses, and kick or ban users from the space and/or rooms.

Users who possess the power, but not any power above nyadmin are known as **nyadmins**. Nyadmins are at the bottom of the Cumball power structure, being below [Head Admins](#) who are below the server/room owner (who is usually [Filled With Nothing](#)).

Etymology

The term **nyadmin** is a portmanteau of the cat onomatopoeia *nya* and the word *admin*, and was coined by the [roleplayer Pao](#) during her time as the character [Skittle-chan](#) in 2021. It was first used as a temporary role given to her after her excessive begging for admin in [Cumball](#), but eventually evolved to be used as the name for the regular admin role in the server.

Origin

Nyadmin was originally created as a Discord moderator role specifically for [Pao](#), but eventually evolved into the admin role of Cumball and its official successors/spinoffs like the short-lived [Cumball Revolt](#) and the Cumball Matrix space.
