Welcome to the official Mun Twitter Wiki.

Now back from the dead, saved from the clutches of the Wikia/Fandom adpocalypse, this is a wiki that primarily documents many events, users, images, memes, or anything else significant in or around cunny.taxi, cunny.zone and the Cumball Discord server, and beyond.

Mun Twitter Wiki (MTW) is completely ad-free, being funded out of pocket by the wiki admin and site owner [cab](#) and possibly with user donations in the future.¹⁾ Being a public, free, resource, it will be abused by bad actors at any time, so it is currently being moderated by cab personally as of writing.²⁾ Despite being actively moderated, however, there are very few rules, making this wiki another bastion of freedom like cunny.taxi's other services. (the wiki is presently the only service on offer, but more are in development)

MTW has many different plugins that enhance the user experience both in writing and in reading. We have a total of 4 plugins in use: MindTheDark (dark mode. by Remo Scheidegger), Notes (by Anael Mobilia), Infoboxes (by Kanaru), and Imageboxes (by Lukas Rademacher, FFTiger & myst6re), with more to come in the future to cater to our active writers and readers. Users here are able to recommend plugins to cab, however plugin recommendations may not be considered if they conflict with other plugins or negatively affect the user experience.

If you would like to edit, you are only allowed to do so after creating an account. This is mainly for moderation purposes, as complete anonymity would make moderation extremely difficult. Also, wouldn't you like to save your work under a name instead of an IP?

For context about the undead, stale meme that serves as the current name of this wiki, start [here](#).
